

How to use Fortuna with Dropbox.com to access from anywhere

FREE Real Estate CRM is available for Mac and Windows as Native apps. Whilst they cannot be run from a browser you can use www.dropbox.com to access your application from any PC or Mac.

- 1) Move the Fortuna Data File:

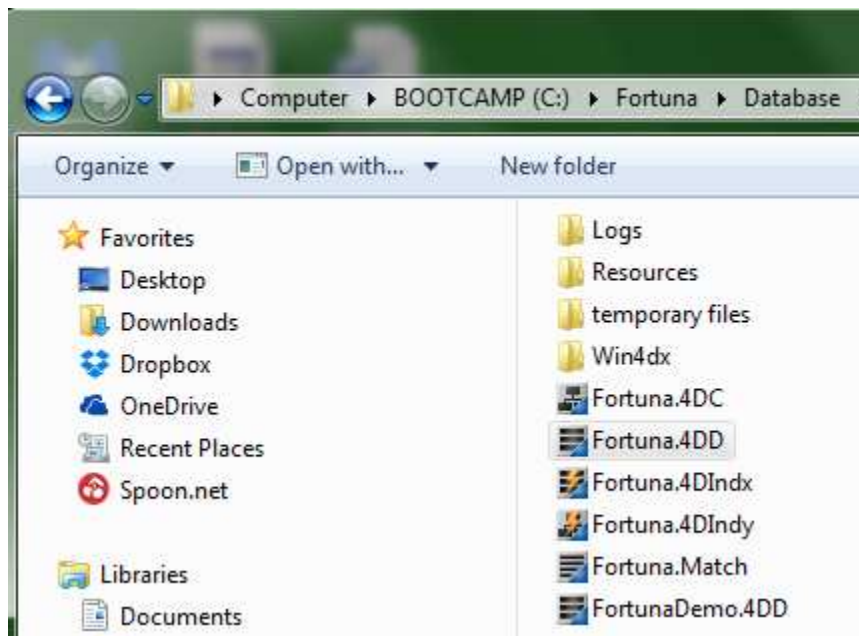

WINDOWS:

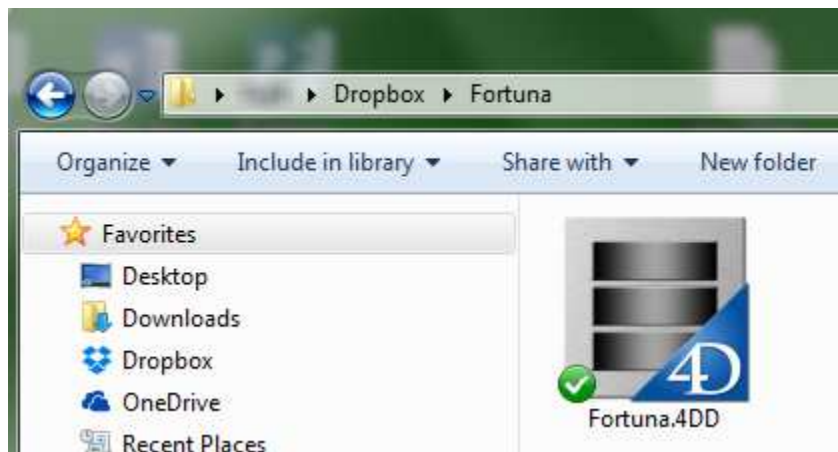

C:\Fortuna\Database\Fortuna.4DD

MAC:

Applications\Fortuna:Database\Fortuna.4DD

and place it in your dropbox folder:

The next time you launch Fortuna simply point to the Fortuna.4DD from the drop box folder.

- 2) Install the software on the other computer, delete the Fortuna.4DD file from C:\Fortuna\Database folder (YES!). Launch Fortuna as normal, when prompted open the Fortuna.4DD file from the dropbox folder as above.

This way you can use Fortuna from any computer and take advantage of a fully integrated native application. This way you can access Fortuna from Work or Home in the most secure manner as no one else can access your dropbox folder!

Disclaimer: You must have a valid Dropbox account. We have no commercial arrangements with Dropbox.
